

“We Trusted Them”

30-second spot, Kerry 2004

ANNCR: We trusted them with our economy, and we lost more than a million jobs.

We trusted them with our budget surplus, and they turned it into a record-breaking deficit.

We trusted them with our environment, and they made it easier for their contributors to pollute our air.

We even trusted them with the lives of our soldiers, and they turned us into occupiers of a hostile land.

Can we really afford to trust them with another four years?

It's time for government we can believe in. This November 2, vote John Kerry for President.

“Energy”

30-second issue spot, Kerry 2004

ANNCR: Energy: it's the lifeblood of our prosperity. But when industry insiders dictate policy from behind closed doors, the rest of us are left with high prices, dirty air, and an economy held hostage by foreign interests.

John Kerry sees a brighter future, with American know-how moving us from importing oil to exporting energy-efficient technology.

Good for our economy, good for our environment, and good for national security. With the Kerry energy plan, we'll all be breathing easier.

Vote John Kerry for President.

“Social Security”

30-second issue spot, Kerry 2004

ANNCR: Social Security: it's supposed to be a rock-solid promise to every hard-working American. But after huge tax cuts for the wealthiest, they're using *our* retirement money to pay the bills. And now there's even talk of cutting our benefits to cover the deficit.

John Kerry sees a fairer future, where Americans don't have to wonder if they can afford the retirement they've earned. And with lower deficits to keep interest rates low, America's businesses can get our workers back on the job. With the Kerry economic plan, we'll all be more secure.

Vote John Kerry for President.
